SAAS BUSINESS ANALYTICS PLATFORM
"CloudMetrics Inc." - A B2B Analytics Software Company

BUSINESS CONTEXT:

CloudMetrics Inc. is a SaaS company providing business intelligence tools.

The management team needs analytical insights to:

1. Track Monthly Recurring Revenue (MRR) and growth trends:
    - Monthly Recurring Revenue (MRR) by plan, segment, and cohort
    - MRR movement breakdown: New, Expansion, Contraction, Churned
    - Revenue concentration risk (top 1%, 5%, 10% of customers)

2. Analyze customer churn and retention patterns:
    - Overall and cohort-based churn rates
    - Churn by customer tenure (early vs long-term)
    - Churn by plan, industry, and usage level

3. Identify top-performing customers and at-risk accounts:
    - RFM (Recency, Frequency, Monetary) segmentation
    - High-value vs high-cost customer identification
    - At-risk customer scoring

4. Measure support team performance and customer satisfaction:
    - First response time and resolution time trends
    - Ticket volume per customer and per plan
    - Repeat-ticket rate analysis

5. Business Impact & Decision Intelligence:
    - Revenue impact of churn reduction scenarios
    - Feature ROI analysis (adoption vs retention lift)
    - Support performance impact on revenue retention

Additional information: The **dataset** is shared along with the **DDL** for the tables.

DELIVERABLES:

1. An SQL file with the queries used to get the final output.
2. A screen video explaining the queries used in your solution (run the queries in the video while explaining).

Bonus: Create a dashboard on Snowflake visualizing your output.

DURATION:

You have **7 days** to complete this project. Expected to be delivered on the 29th of Jan by EOD (End of Day).
